Test Comments: *This was a new location in the region that delivered very good results. Planting conditions were very good. The end of June and month of July were very dry. Plants were tall with no lodging issues. Ears were well pollinated and filled with deep kernels. Strong cobs made shelling easy. Lawrence and Mike, our host farmers, are pleased with their yields, even with the stress the crop endured.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
