Test Comments: *This test site was pretty dry late in the season. Even though it was dry, this crop still ended up yielding very well. The area in general encountered timely rains in the beginning of the season. The plot ended up missing some of the more severe storms that passed through the area. In the end, weather turned out great for pollination. This was a great standing plot for this area.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
