**Test Comments:** *This site headed directly into summer weather patterns immediately after planting. May brought record warmth to Missouri this year. Stress during the pollination period limited yield potential somewhat. Stalk quality was very good at harvest. No sign of stalk quality degradation. Scott, our host farmer, mentioned his corn was yielding a tad less than last year. This is a good river bottom trial.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
