

NuTech Seed announces the availability of Enlist E3™ soybeans
Central Corn Belt growers can choose from 12 varieties for 2019 planting

CHAMPAIGN, Ill., February 22, 2019 — New for 2019, NuTech Seed will offer Enlist E3™ soybeans to growers in the Central Corn Belt. With 12 Enlist E3 soybean varieties available for 2019 planting, NuTech customers will have new options in the fight against resistant weeds.

Enlist E3 soybeans offer tolerance to 2,4-D choline in Enlist™ herbicides, glyphosate and glufosinate for a new standard in weed control and yield potential.

“Year after year, our battle against weeds gets tougher,” said NuTech Seed General Manager Brad Damery. “Here in the Central Corn Belt, weeds like waterhemp, marestail and pigweed are growing more resistant, so growers need new tools to fight them. That’s why we’re so excited about Enlist E3 soybeans.”

As a part of the Enlist weed control system, Enlist E3 soybeans can be sprayed with Enlist Duo® and Enlist One® herbicides. Both herbicides feature 2,4-D choline with Colex-D® technology to provide superior weed control with minimized potential for physical drift and near-zero volatility.

“At NuTech, we’re focused on helping our customers live a lifestyle filled with success, enjoyment and family,” said Damery. “Controlling weeds and increasing yields is part of that. It’s hard to enjoy farming when weeds overrun your fields and hurt profitability. Enlist E3 soybeans offer a solution to this, and we think our customers will be very pleased with the results.”

NuTech has a range of maturities available now for 2019 planting. Each variety has been selected and tested to perform in the Central Corn Belt. For more information, visit www.nutechseed.com.

About NuTech Seed

NuTech Seed, headquartered in Champaign, IL, was formed in 2001 and purchased by DuPont Pioneer in 2010. NuTech serves growers in the Central Corn Belt through a philosophy called the NuTech Lifestyle, which pairs high-performance seed with taking time to enjoy what makes farm life special—success, enjoyment and family. ###

Enlist E3 soybeans were jointly developed by Dow AgroSciences and MS Technologies. Enlist Duo and Enlist One herbicides are not registered for sale or use in all states or counties. Contact your state pesticide regulatory agency to determine if a product is registered for sale or use in your area. Enlist Duo and Enlist One herbicides are the only 2,4-D products authorized for use in Enlist crops. Consult Enlist herbicide labels for weed species controlled. Always read and follow label directions.
